>PQ-L

Ventilatori centrifughi pale rovesce

Backward curved blade centrifugal fans

Versioni / *Versions:*

DESCRIZIONE GENERALE

I ventilatori della serie PQ-L trovano la loro principale applicazione negli impianti civili e industriali di condizionamento, ventilazione, riscaldamento e filtrazione. Possono convogliare aria pulita e fumi polverosi (non abrasivi), con temperatura max di 80°C nella configurazione standard e fino a 300°C con costruzione speciale. La serie prevede esecuzioni direttamente accoppiate (esecuzione 4) e a trasmissione (esecuzione 1, 9 e 12). Adatto per portate elevate e pressioni medio-alte.

COSTRUZIONE

- Cassa a spirale realizzata in lamiera d'acciaio e protetta contro gli agenti atmosferici con vernici a polveri epossipoliestiriche.
- Boccaglio d'aspirazione con ampio raggio realizzato in lamiera d'acciaio e protetto contro gli agenti atmosferici con vernici a polveri epossipoliestiriche.
- Girante a semplice aspirazione con pale rovesce curve ad alto rendimento aeraulico, realizzata in lamiera e verniciata con vernici a polveri epossipoliestiriche. Sono previste versioni per alte velocità di rotazione in classe 3.
- Per esecuzione 1 – 9 – 12: supporto monoblocco realizzato in fusione di ghisa, con cuscinetti a sfera, progettati per agevolare le operazioni di lubrificazione. Cinghie di trasmissione, pulegge e supporto motore. Carter di protezione per le cinghie.
- Motore asincrono trifase a norme internazionali IEC 60034, IEC 60072, EMC 2004/108/CE, LVD 2006/95/CE e marcato CE IP55, classe F, idonei ad un servizio S1 (funzionamento continuo a carico costante).

ACCESSORI (disponibili su richiesta)

- Tappo scarico condensa (TS)
- Portella d'ispezione (PI)
- Controflangia per bocca aspirante (CFA)
- Controflangia per bocca premente (CFP)
- Rete di protezione per bocca aspirante (RA)
- Rete di protezione per bocca premente (RP)
- Giunto antivibrante per bocca aspirante (GA)
- Giunto antivibrante per bocca premente (GP)
- Regolatore di portata in aspirazione
- Serranda ad alette contrapposte in premente
- Supporti antivibranti

A RICHIESTA

- Versione idonea al trasporto di gas caldi, max 150°C (PQ-L/AT es 4).
- Versione idonea al trasporto di gas caldi, max 300°C (PQ-L/AT es 1-12).
- Versione resistente all'azione corrosiva del gas trasportato, realizzata con cassa, boccaglio e girante in acciaio inossidabile AISI304 (PQ-L/INOX).
- Versione ATEX: motore asincrono trifase II2G, II2D, II2GD a norme internazionali IEC 60034, IEC 60072, IEC 60079 e/o IEC 61241, EMC 2004/108/CE, LVD 2006/95/CE, con certificati ATEX e marcatura CE, IP 55/IP 65, classe F, idonei ad un servizio S1 (funzionamento continuo a carico costante).

GENERAL DESCRIPTION

Fans of PQ-L series find their main application in industrial plants of conditioning, ventilation, heating and filtering; they can also be used as part of manufacturing process (wood industry, chemical industry, mills, mines, foundries, etc.). They can convey dusty (not abrasive) air and smoke, with max. temperature of 80°C in the standard configuration and up to 300°C with specials constructions. The series foresees direct drive version (execution 4) and belt drive version (execution 1, 9 and 12). Suitable for high capacity, medium-high pressures.

CONSTRUCTION

- *Volute casing in steel sheet , protected against atmospheric agents by epoxy paint.*
- *Aerodynamically shaped inlet cone in steel sheet, protected against atmospheric agents by epoxy paint.*
- *Single inlet backward curved wheel with high efficiency, manufactured in steel sheet and epoxy painted. For high rotational speed, versions in class 3 are foreseen.*
- *For execution 1 – 9 – 12: mono-block support in cast iron with ball bearings, , designed for easy lubrication. Pulleys, belts and motor support. Belt protection guard.*
- *Asynchronous three-phase motors according to international standards IEC 60034, IEC 60072, EMC 2004/108/CE, LVD 2006/95/CE, CE marked, IP 55, class F, suitable to S1 service (continuous working at constant load).*

ACCESSORIES (available upon request)

- *Condensation drain hole (TS)*
- *Inspection door (PI)*
- *Inlet counter-flange (CFA)*
- *Outlet counter-flange (CFP)*
- *Inlet protection guard (RA)*
- *Outlet protection guard (RP)*
- *Inlet flexible connector (GA)*
- *Outlet flexible connector (GP)*
- *Inlet vane control*
- *Outlet setting shutter*
- *Anti-vibration mounts*

UPON REQUEST

- *High temperature version suitable for conveying hot gases, Max 150°C (PQ-L/AT EX4).*
- *High temperature version suitable for conveying hot gases, Max 300°C (PQ-L/AT EX1,12).*
- *Corrosion resistant version, manufactured with casing, inlet side and impeller in stainless steel AISI304 (PQ-L/INOX).*
- *ATEX version, with asynchronous three-phase motors II2G, II2D, II2GD according to international standards IEC 60034, IEC 60072, IEC 60079 and/or IEC61241, EMC 2004/108/CE, LVD 2006/95/CE, with Atex certification, CE marked, IP55/IP 65, class F, suitable to S1 service (continuous working at constant load).*

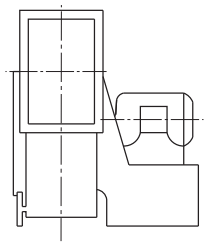
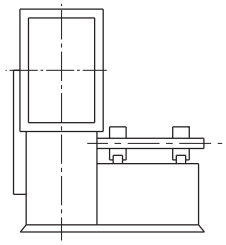
ESECUZIONI *Executions* PQ-L

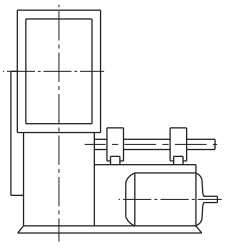
4: Girante a sbalzo direttamente accoppiata al motore, sostenuto dalla base/sedia.
4: Impeller directly coupled to the motor supported by the motor support base.



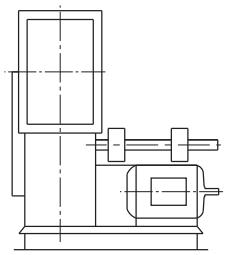
1: Predisposizione all'accoppiamento con cinghie e pulegge, girante a sbalzo, direttamente accoppiata a supporto sostenuto dalla base/sedia.
1: Arrangement for belt drive with impeller directly coupled to the support shaft carried by the motor support base.



9: Come esecuzione 1 con predisposizione al montaggio del motore posto sul fianco della base/sedia.
9: Same as execution 1 with arrangement for the motor assembled on the side of the support base.



12: come esecuzione 1 con predisposizione al montaggio del motore e ventilatore su unico telaio di fondazione.
12: same as execution 1 with arrangement for fan and motor mounted on common basement.



POSIZIONE MOTORE *Motor position* PQ-L
